February 2017

REACH with Ecolab

Dear Valued Customer,

Based on current and available information, only a very small segment of Ecolab products sold within the European Union contain Substances of Very High Concern (SVHC) as listed on the Candidate List published by the European Chemicals Agency (ECHA).

To view the Candidate List of SVHC, please visit:
http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp.

This table reflects the affected Ecolab products. There were no additional Ecolab substances or products affected by the updated Candidate List as of **12 January 2017**.

EINECS #	CAS	Product

Ecolab tracks the percentage of products in our portfolio that contain SVHCs. Currently less than 2.0% of our product portfolio is affected.

Although the REACH regulation does not apply to articles, it may apply to substances contained in articles when Substances of Very High Concern (SVHC) are present in the article above 0.1% (w/w) concentration. Ecolab purchases articles (equipment) from third parties. We are in the process of obtaining information about SVHCs in articles from our suppliers, and will provide further updates as information is available.

If you would like more information regarding our position on REACH, please visit our website at www.ecolab.com. If you have further questions, please contact me directly or send your query to Reach@ecolab.com.

Sincerely yours,

i.V.
