Healthy guests are happy guests.

In the hospitality industry, protecting the health of your guests is essential to ensuring their satisfaction. Establishing a comprehensive hand washing program throughout your facility can help prevent the spread of illness among guests as well as employees for a healthier, more productive operation. At Ecolab, we've developed a total hand hygiene system that combines effective chemistry with technology and training—making your hand cleaning habits efficient, safe[†] and simple.

WHY FOCUS ON HANDWASHING?

ABOUT 30%

of gastrointestinal sicknesses can be prevented by handwashing.¹

95% OF PEOPLE

don't wash their hands adequately.²

THREE DAYS

is the amount of time some germs can live on moist surfaces.³

¹<http://www.cdc.gov/handwashing/why-handwashing.html>

²<http://www.flu.gov/planning-preparedness/hospitality/influenzaguideance.html>

³<http://msutoday.msu.edu/news/2013/eww-only-5-percent-wash-hands-correctly/>

AN EASIER WAY TO IMPROVE HAND HYGIENE.

Nexa™ Dispensers

Easy, efficient
handwashing.

The Nexa Dispensing System provides efficiency, innovation and sustainability in one sleek, but adaptable, dispenser. Available in manual or touch-free.

Use fewer batteries.

Energy saving touch-free dispenser requires fewer battery change-outs.¹

Inhibit bacterial growth.

Antimicrobial protection in the manual dispenser push bar continuously blocks the growth of bacteria, mold and mildew.²

Optimize product use.

Improved HDPE³ packaging is not only recyclable, it also helps to maximize product evacuation—dispensing up to 99 percent of product.

Prevent costly waste.

Patented pump pulls excess product back in, reducing clogs and drips that result in costly product waste and preventing potential slips and falls.

Nexa™ Concentrates

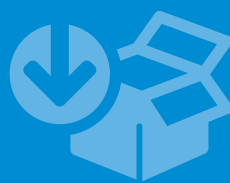

A sustainable solution
that helps save money.

Ecolab's Nexa Concentrates provide sustainability and cost savings with uniquely designed refillable bottles for use with both Syncra™ and Nexa dispensers.

Reduce waste.

Ecolab's sustainably designed system reduces packaging waste by up to 90 percent. The refillable design virtually eliminates product waste and makes refills a predictable part of your routine.¹

Save on shipping costs.

The concentrated formula of Nexa Concentrates mean you need to order less frequently, reducing shipping costs and saving on storage space. Fewer, smaller packages also helps reduce waste pickup.

Wash with confidence.

Nexa Concentrates' refillable bottles feature a sealed system and in-chemistry preservatives to ensure safe² and effective application time-after-time.

¹Packaging waste calculation based on a 1:10 dilution ration for Nexa Concentrates compared to standard 750mL packaging.

²Safe as long as products are used as directed.

Syncra™

Effective handwashing made simple.

A breakthrough innovation in hand hygiene, Syncra's automated touch-free water and soap delivery system provides more effective handwashing results. With a pre-programmed, three-step process for handwashing and rinsing, Syncra ensures consistent compliance with every wash.

3 EASY STEPS

- ✓ WATER & SOAP
- ✓ TIMED LATHER & SCRUB
- ✓ RINSE

Improve handwashing compliance.

Syncra combines easy-to-use technology with safe¹, effective germ-killing power to help increase handwashing compliance.

Eliminate the "ick factor."

With touch-free activation, Syncra bypasses germs that can grow on traditional faucet handles and soap dispensers.

Reduce water use.

Syncra's timed delivery saves on excessive water use—dispensing just the right amount of water for a thorough clean. This can reduce your water usage by up to 50 percent².

¹Safe as long as products are used as directed.

²Water reduction calculated vs. a traditional faucet which runs based on FDA Food Code recommended wash time.
